About Me

Backend Developer | AI Application Developer

Hello, I'm Jeea You.

I worked in South Korea for two years as a Java backend and web developer, gaining hands-on experience in HR system maintenance, feature development, data processing, business automation, and attendance system customisation. I also build multilingual web applications using AI technologies.

-  Java & Spring Boot backend system development
-  Data processing and HR system development experience
-  Multilingual web application development
-  AI-powered smart web service development

Jeea You

Backend Developer & AI Application Developer

-  London, United Kingdom
-  2 Years of Backend Experience

Backend Experience

Two years of professional experience in Java/Spring backend development, HR systems, business automation, and production support

01

Goodinvent - Samsung Biologics Assignment May 2023 - Aug 2024

Maintained and enhanced a large-scale enterprise HR system used by employees and HR teams. Developed new features, processed employee and attendance data, integrated REST APIs and automated repetitive HR tasks using Brity RPA.

KEY WORK maintained HR modules · developed new features · handled employee data · automated repetitive tasks

STACK

Java

Nexacro

Oracle

MS SQL

REST API

WebLogic

Tomcat

JSP

SVN

Brity RPA

02

Goodinvent - Head Office Sep 2024 - April 2025

Maintained the company's internal HR system and customised it for client companies based on their requirements. Developed and modified attendance, leave, schedule and approval features using Java, Spring Boot and PostgreSQL.

KEY WORK built HR functions · customised business rules · worked with PostgreSQL · supported user requests

STACK

Java

Spring Boot

PostgreSQL

JSP

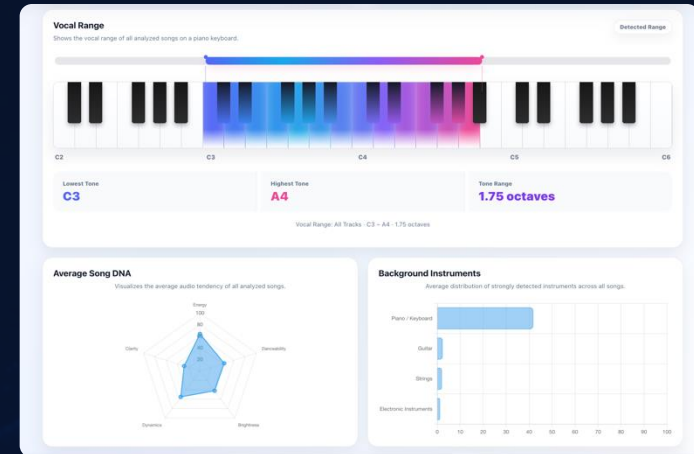

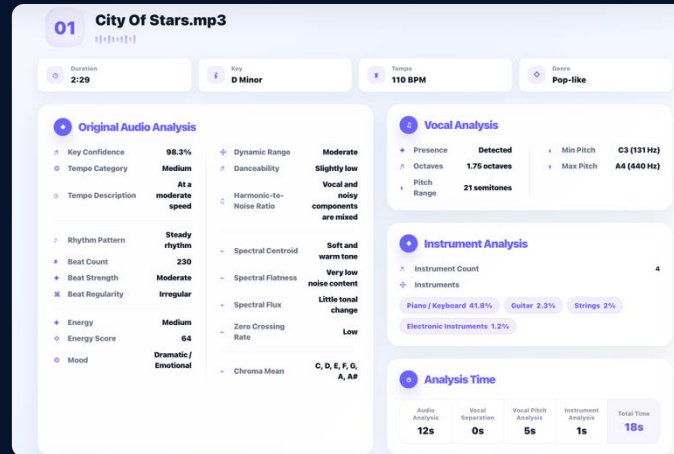

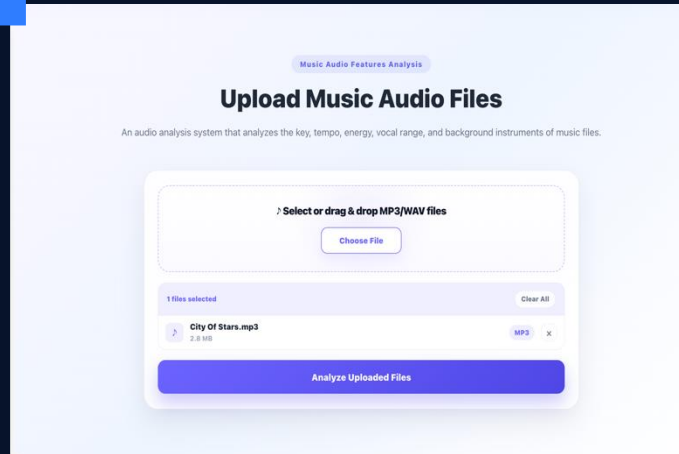

REST API

SVN

Main Project : Audio Analysis Program

Selected projects combining backend engineering and AI application development

1

MusicAI

Audio analysis, vocal separation, pitch and range analysis, instrument classification and results dashboard.

KEY CAPABILITIES

Source separation · Vocal range
Instrument insights · Results dashboard

STACK Python · Flask · Librosa · Demucs · NumPy · Pandas · FFmpeg · PyTorch · torchcrepe

Project Deep Dive: MusicAI

An AI-powered web application for audio analysis, source separation, vocal pitch detection, and interactive result visualisation

Core Workflow

- 1 Upload MP3/WAV files
- 2 Validate and store the uploaded audio
- 3 Create and run a background analysis job
- 4 Separate vocals from instrumental accompaniment
- 5 Extract musical, spectral, and vocal features
- 6 Track progress and support job cancellation
- 7 Store and visualise the analysis results

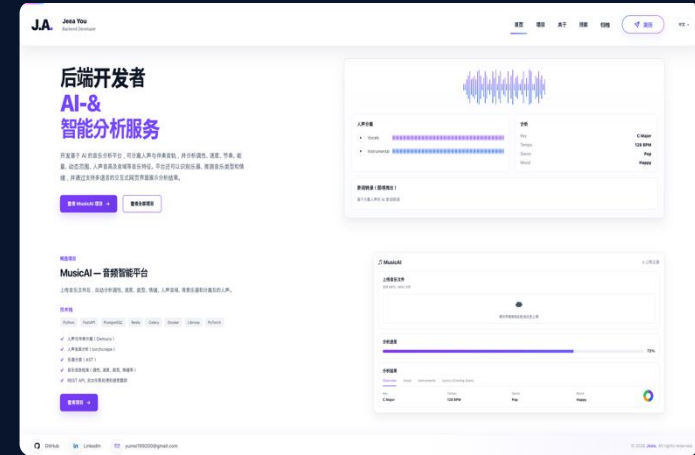

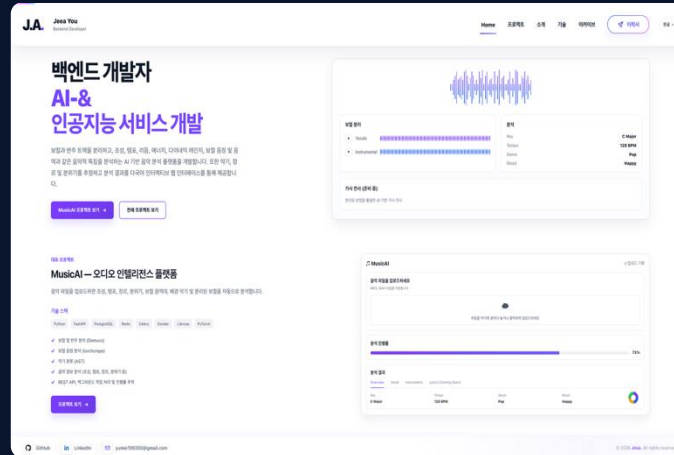

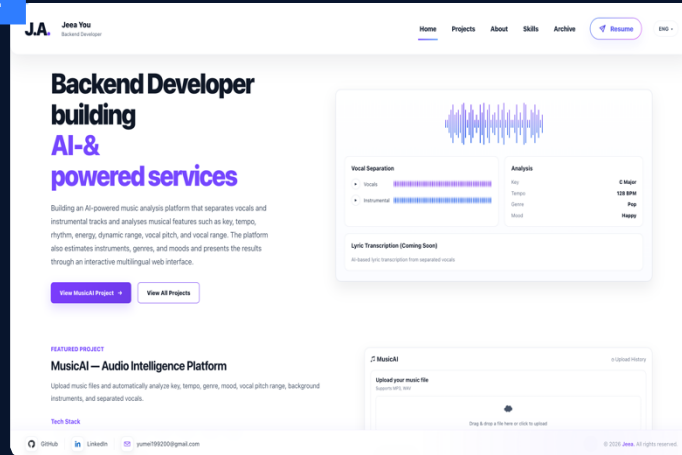

Technical Highlights

Demucs	Vocal and instrumental source separation
Librosa	Key, tempo, rhythm, energy and spectral-feature analysis
torchcrepe	Vocal pitch tracking and vocal-range estimation
FFmpeg	Audio conversion and format standardisation
SQLAlchemy	Music file, analysis job, progress and result persistence
JavaScript	File upload, progress tracking, cancellation, result rendering and interactive visualisation

Featured Projects : Main Page

Selected projects combining backend engineering and AI application development

2

Portfolio Main Page

A multilingual portfolio landing page with English, Korean and Chinese language switching and responsive project navigation.

KEY CAPABILITIES

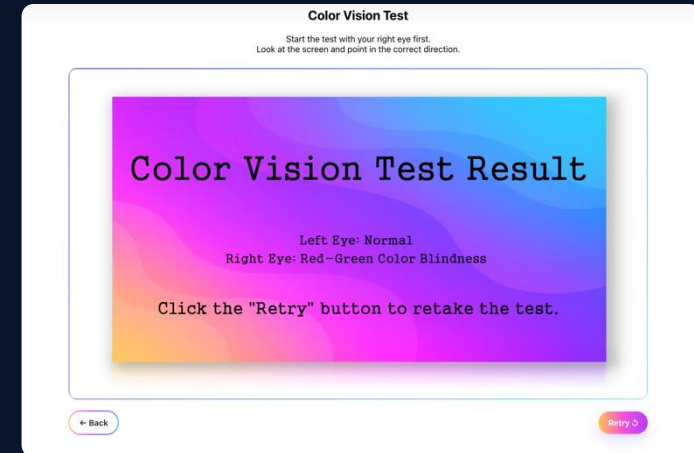

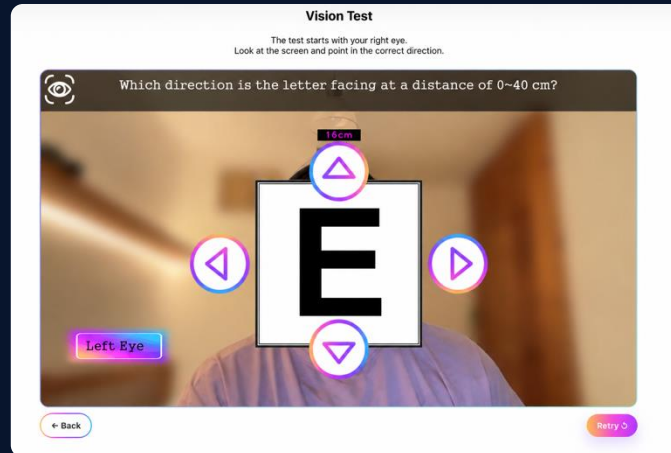

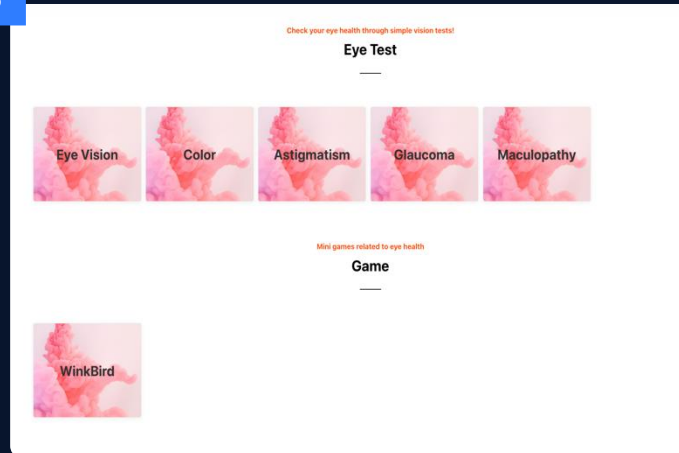

English · Korean · Chinese
Responsive layout · Project navigation

STACK Python · Flask · i18n · SQLAlchemy · python-dotenv

Featured Projects : EyeCareX

Selected projects combining backend engineering and AI application development

3

EyeCareX

Interactive eye-health test demonstrations using Flask, browser UI and computer-vision based interaction.

STACK Flask · CVZone · MediaPipe · OpenCV · NumPy · Pandas · Pillow

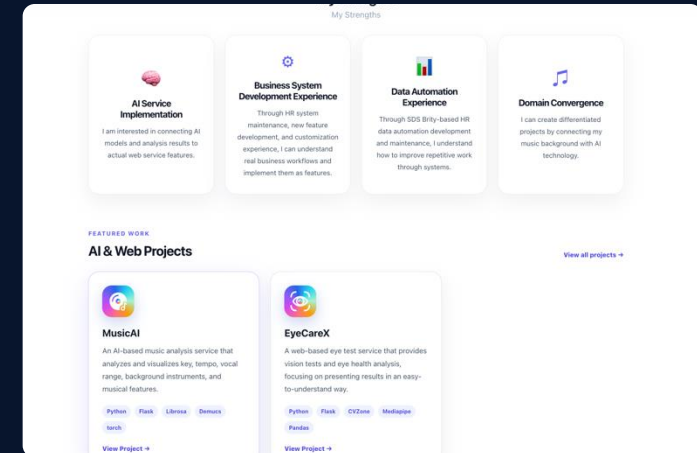

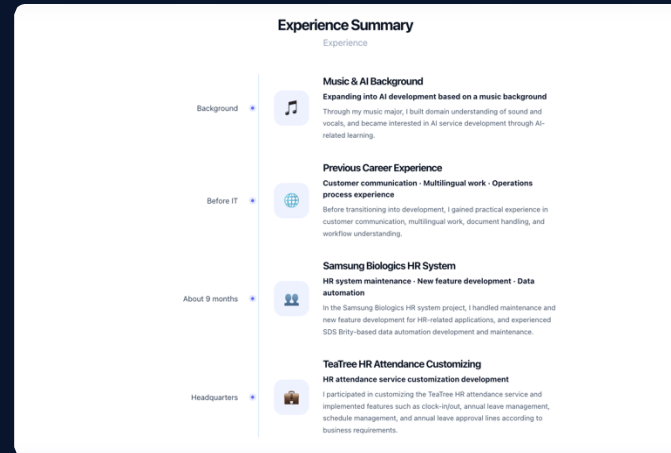

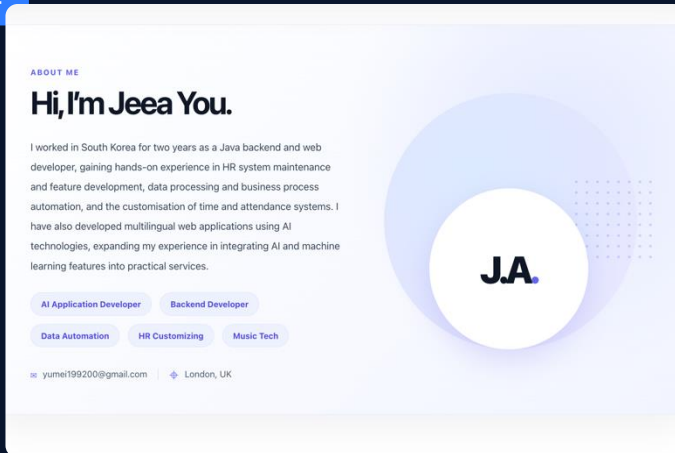

KEY CAPABILITIES

Eye-health demonstrations · Browser UI
Computer-vision interaction

Featured Projects : About Me

Selected sections highlighting my professional experience, strengths, and technical skills

4

About Me

A multilingual profile page presenting my backend development experience, professional strengths and AI-based personal projects.

STACK Python · Flask · i18n · SQLAlchemy · python-dotenv

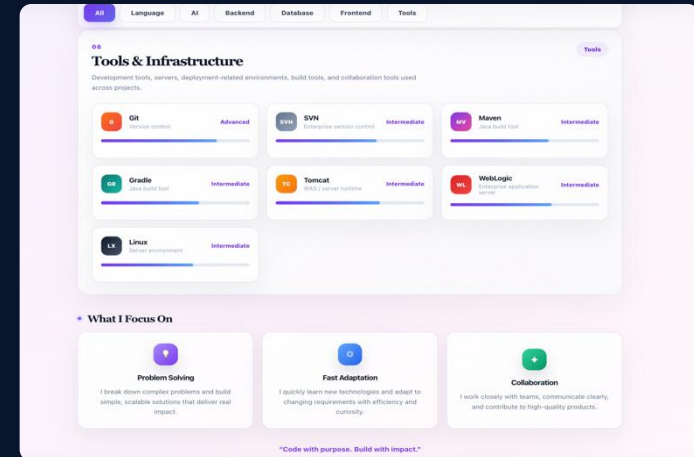

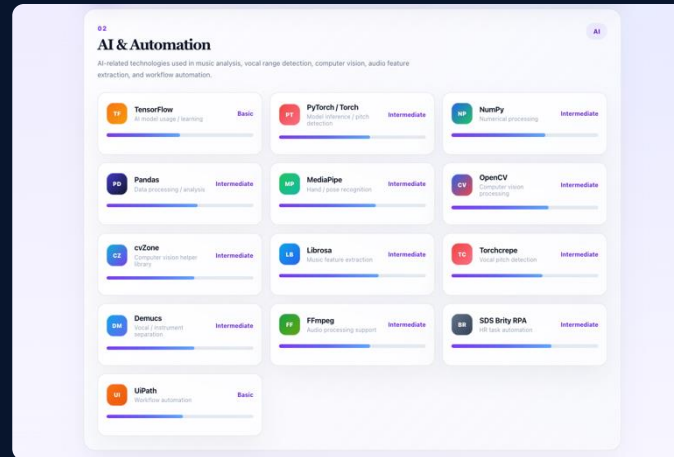

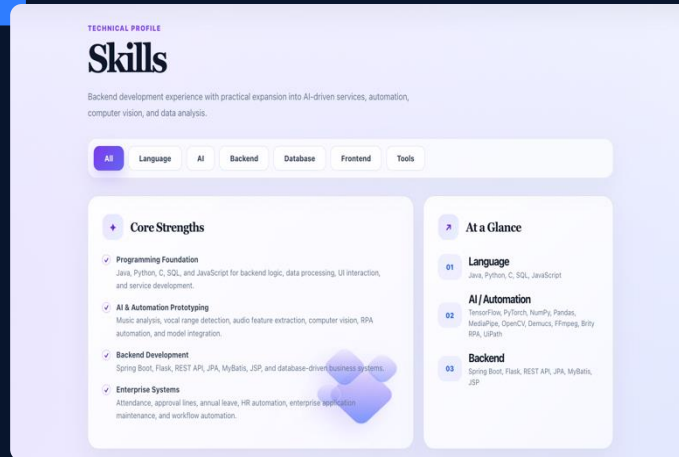

KEY CAPABILITIES

Multilingual profile · Experience summary
Strengths overview · Project showcase

Featured Projects : Technical Skills

Selected sections highlighting my professional experience, strengths, and technical skills

5

Technical Skills

A structured overview of my backend, database, web, AI, automation and development-tool experience.

STACK Python · Flask · i18n · SQLAlchemy · python-dotenv

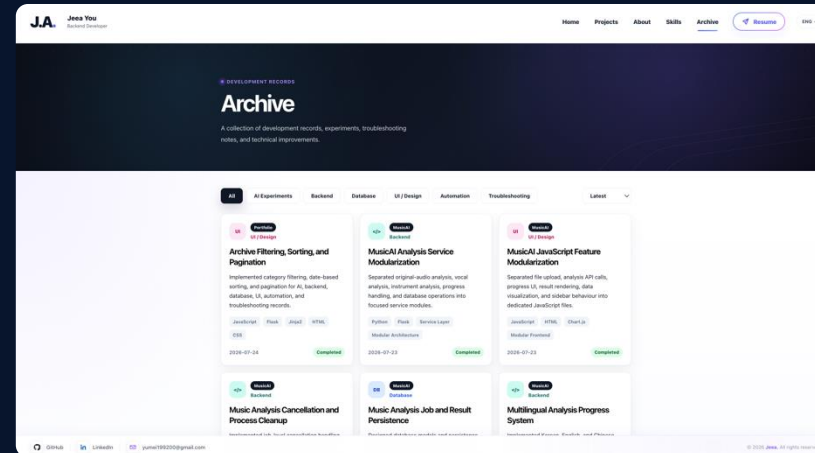

KEY CAPABILITIES

Backend · Database · Web
AI · Automation · Development tools

Featured Projects : Development Archive

Additional portfolio features for documenting development work and managing a multilingual resume.

6

Development Archive

A searchable development archive for documenting project updates, technical improvements, troubleshooting and completed features.

KEY CAPABILITIES

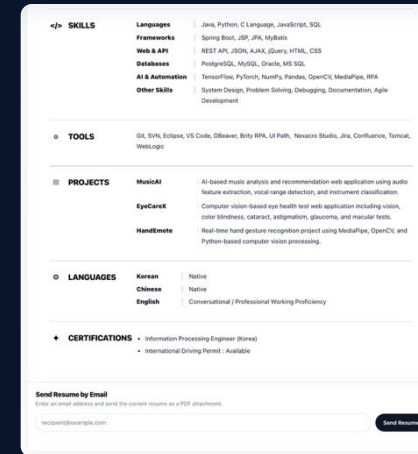

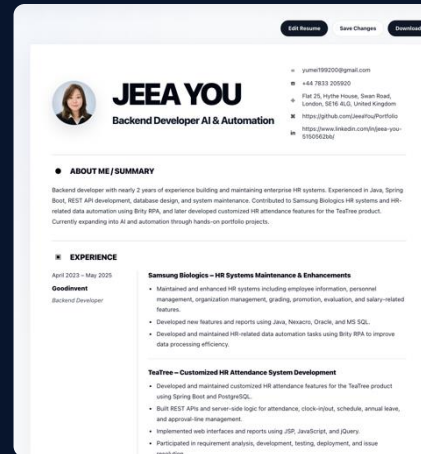

Searchable records · Project updates
Technical improvements · Troubleshooting

STACK Python · Flask · i18n · SQLAlchemy · python-dotenv

Featured Projects : Resume Management

Additional portfolio features for documenting development work and managing a multilingual resume.

7

Resume Management

A database-driven resume system with multilingual content management, PDF generation and email delivery.

STACK Python · Flask · i18n · SQLAlchemy · python-dotenv · WeasyPrint · smtplib · EmailMessage

KEY CAPABILITIES

Multilingual content · PDF generation
Database-driven · Email delivery

Portfolio

A database-driven multilingual web application for portfolio content, resume management, project documentation, and PDF delivery

Multilingual Content

Portfolio content is managed in Korean, English, and Chinese through reusable database-driven translation structures.

[Translate table](#), [Flask](#), [Jinja2](#), [MySQL](#), [i18n](#)

Resume Management

Editable resume sections are stored in the database and rendered into a UK-style CV with PDF generation and email delivery.

[Resume table](#), [WeasyPrint](#), [SMTP](#), [SQLAlchemy](#), [Jinja2](#)

Development Archive

Development records can be filtered by category, sorted by date, and reviewed as structured technical notes and implementation history.

[Archive items](#), [JavaScript](#), [SQLAlchemy](#), [Flask](#)

Modular Architecture

Flask Blueprints separate portfolio pages, AI applications, services, templates, static assets, and database logic.

[Blueprints](#), [Service Layer](#), [Templates](#), [SQLAlchemy](#), [Flask](#)

Technical Skills

Technical capabilities across backend, AI, data, automation, and delivery

Languages

Java · Python · JavaScript · SQL · C

Backend

Spring Boot · Spring · Flask · REST API · JPA · MyBatis · SQLAlchemy

Database

PostgreSQL · Oracle · MS SQL Server · MySQL

UI

HTML/CSS · JavaScript · Jinja2 · JSP · jQuery · Ajax · Nexacro

AI / Audio / Vision

PyTorch · Librosa · Demucs · torcrepe · OpenCV · MediaPipe · CVZone · Praat-Parselmouth

File Processing

NumPy · Pandas · FFmpeg · Pillow · JSON · CSV · WeasyPrint

Automation & Dev Tools

Brity RPA · UiPath · Git · SVN · Jira · Gradle · Maven · python-dotenv

Servers & Delivery

Tomcat · WebLogic · SMTP/smtp lib · EmailMessage · Flask Blueprints

Thank you for your time

I'm looking for an opportunity to contribute backend development experience.

Jeea You

Backend Developer | AI Application Developer |
Software Developer
